# Forge Your Path

## Mud Grappler® EXTREME TERRAIN LIGHT TRUCK RADIAL

The Mud Grappler® Extreme Terrain provides off-road traction over various terrain, whether it's dirt, rocks or mud. The massive side-lugs and 3-ply polyester sidewall construction add more protection to help prevent sidewall punctures when facing the most challenging off-road obstacles. The Mud Grappler® Extreme Terrain tire can handle anything you throw at it.

Professional driver on closed course

### Off-Road Traction

High void ratio efficiently clears mud and dirt from the tread area to provide excellent traction in extreme terrain.

### Stability and Uniformity

The Mud Grappler® is engineered using state-of-the-art manufacturing processes that improve tire uniformity and quality.

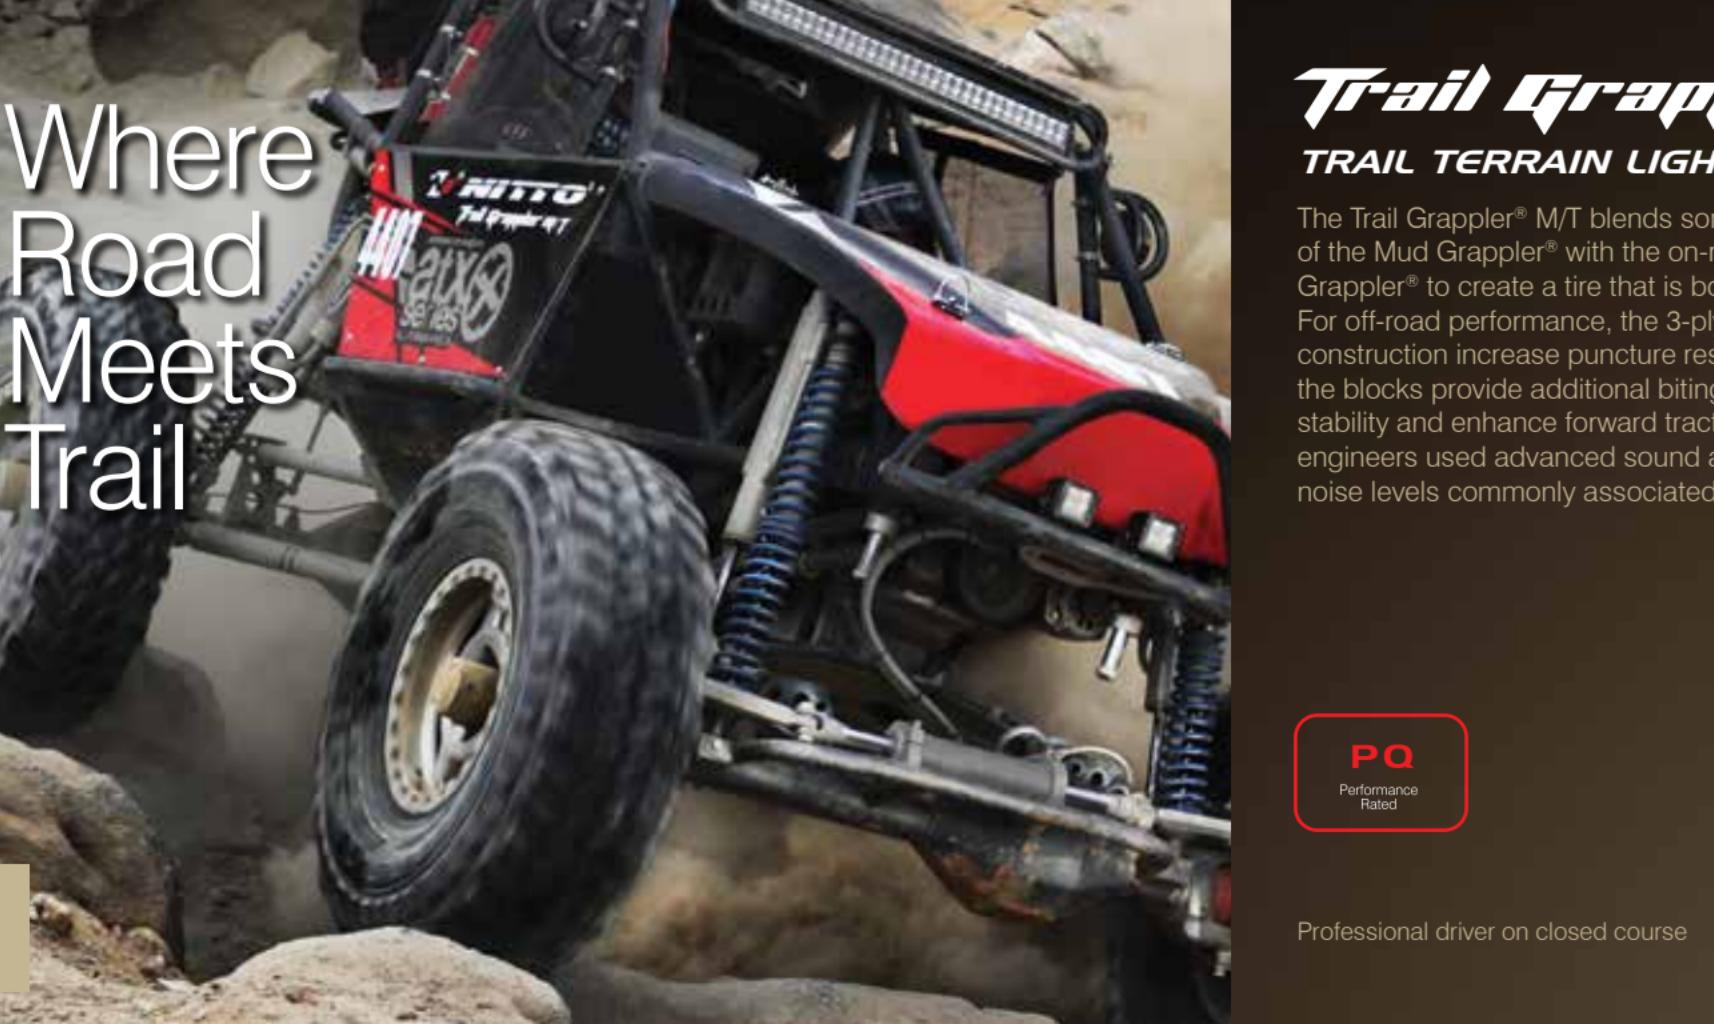

### Puncture Resistance Durability

Three-ply polyester sidewall construction and high-strength steel belt tread package improve puncture resistance.

Rated

## Trail Grappler® M/T TRAIL TERRAIN LIGHT TRUCK RADIAL

The Trail Grappler® M/T blends some of the off-road performance of the Mud Grappler® with the on-road comfort of the Terra Grappler® to create a tire that is both aggressive and quiet. For off-road performance, the 3-ply sidewall and thick rubber construction increase puncture resistance. On the tread surface, the blocks provide additional biting edges that command lateral stability and enhance forward traction. For on-road comfort, Nitto's engineers used advanced sound analysis equipment to reduce noise levels commonly associated with off-road tires.

### Reduced Road Noise

Advanced sound analysis equipment was used to systematically reduce the noises normally heard when driving on off-road tires. The result is a tire 34% quieter at city speeds and 36% quieter at highway speeds.\*

### Durability

The 3-ply sidewall with a high turn-up construction acts as an extra layer of reinforcement to increase puncture resistance.

### On-Road Comfort

Nitto's proprietary, automated manufacturing system produces extraordinarily uniform tires. This creates a smooth ride on paved roads.

### Mud Evacuation

The balanced void ratio efficiently removes mud and dirt from the tread to provide continuous off-road traction.

## Dune Grappler® DESERT TERRAIN LIGHT TRUCK RADIAL

The Dune Grappler® is engineered to provide both on-road comfort and off-road performance. The sidewall lugs and 3-ply\* polyester sidewall construction add protection to resist sidewall punctures. The tread blocks increase rigidity, help reduce irregular wear and minimize road noise.

### Off-Road Traction

The intermediate void ratio between the tread blocks helps to provide off-road performance in loose dirt and sand.

### Strength and Durability

Three-ply polyester sidewall construction\* and sidewall lugs aid in puncture resistance.

### On-Road Manners

The 3D grooving and tread blocks of the Dune Grappler® help reduce tread movement. This helps reduce irregular wear and minimize road noise.

Dune Grappler®

# All-Terrain Performance

## TERRA GRAPPLER® ALL-TERRAIN LIGHT TRUCK RADIAL

The Terra Grappler® offers year-round all-terrain performance through a balance of wet and dry performance and on-road comfort with minimal road noise. The Terra Grappler® All Terrain provides balanced performance in all weather conditions over various terrains.

### Multi-Purpose Traction and Handling

The tread pattern void ratio is balanced for off-road traction and on-road handling. Coupling joints between tread block elements reduce excessive flex for better traction and steering response on and off road.

### All-Season Performance

Deep sipes and lateral voids effectively channel away water. Siping helps resist hydroplaning by cutting through pockets of water on road surfaces. This technology provides all-season traction.

### Off-Road Performance

The lugs on the shoulder are staggered to improve traction in deep sand and loose dirt.

STREET

**NT420S**  
**ALL-SEASON TRUCK AND SUV RADIAL**

The NT420S features a non-directional, asymmetrical pattern that provides confident performance, rain or shine. The outer shoulder has large, continuous blocks to improve dry traction, while the inner shoulder channels away water for wet performance. The NT420S can be cross-rotated so it wears more evenly across the tire. This feature ensures a quieter, more comfortable ride and longer tread life. The result is a comfortable, ultra high performance radial.

# Active All-Season

## **motivo<sup>®</sup>**

**ULTRA HIGH PERFORMANCE  
ACTIVE ALL-SEASON**

The Motivo<sup>®</sup> is the evolution of Nitto's Ultra High Performance street tires engineered to perform in all weather conditions while providing ride comfort, minimal road noise, and increased mileage. Motivo's all-season capability fulfills the demands of your active lifestyle by navigating you safely through challenging road and weather conditions.

<b>WY</b> Performance Rated	<b>560</b> UTQG Treadwear	<b>A</b> Traction	<b>A</b> Temperature

### **Smooth Driving**

Made in the USA using proprietary advanced tire manufacturing technology, Motivo<sup>®</sup> delivers consistent tire uniformity for a smooth and enjoyable driving experience.

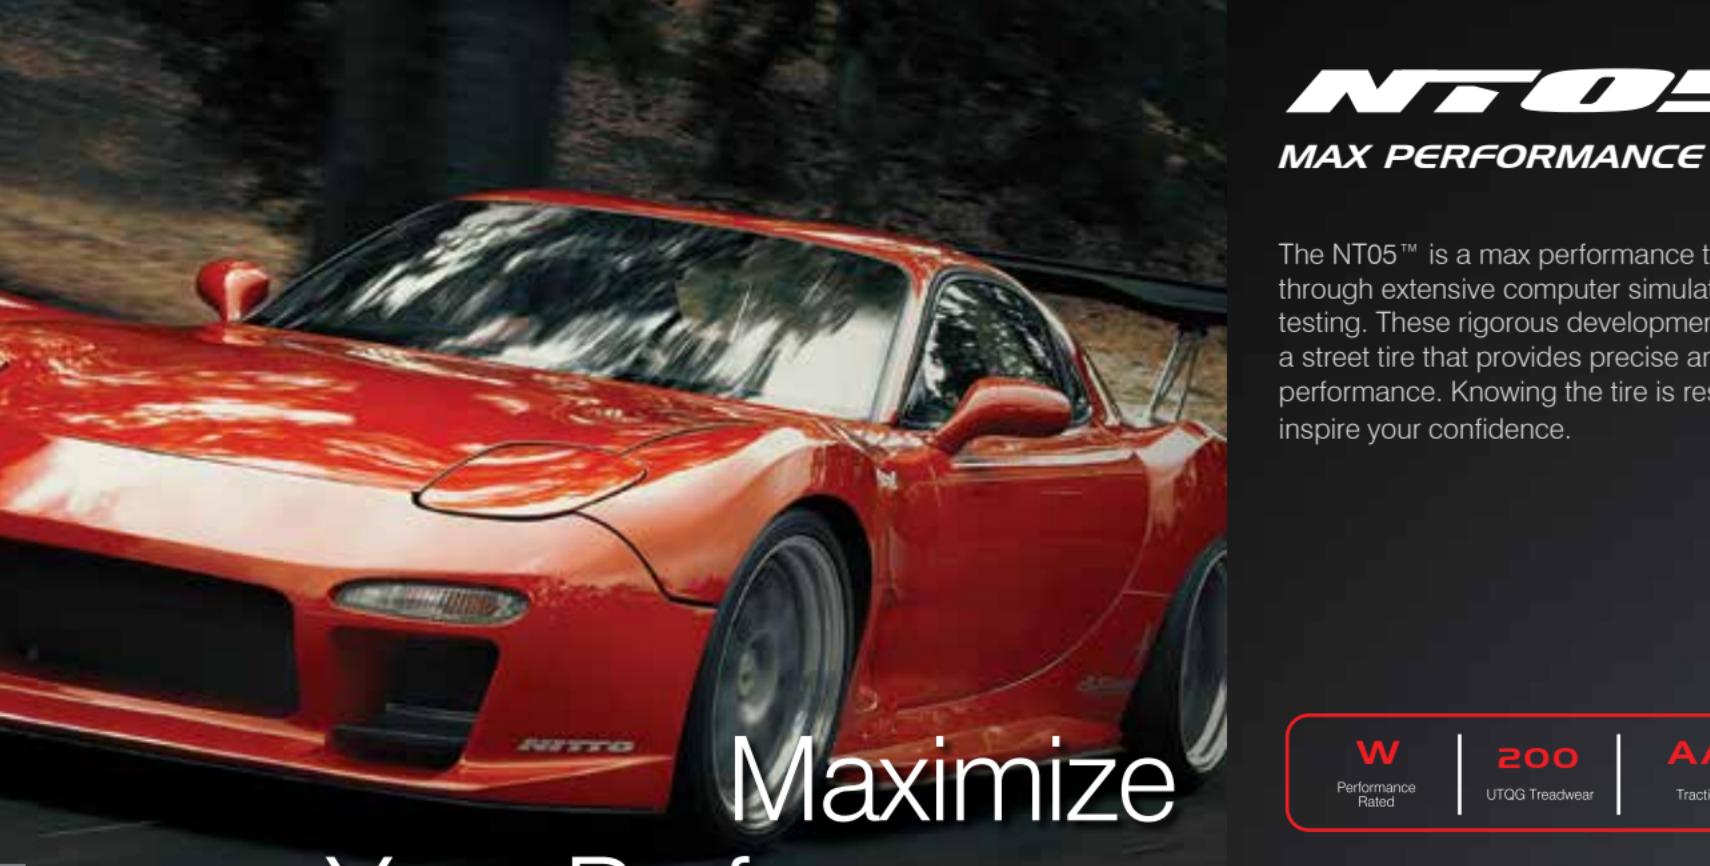

### **Balanced Performance**

Combined with an all-new silica rubber compound, the Motivo<sup>®</sup> aims for more driving miles\* while maintaining traction and handling in winter, wet, and dry conditions.

### **Unique Design**

The distinct pattern attracts the eye while the tread block arrangement is designed to minimize road noise.

# Maximize Your Performance

## NT05™ MAX PERFORMANCE RADIAL

The NT05™ is a max performance tire that was developed through extensive computer simulation modeling and on-track testing. These rigorous development procedures helped produce a street tire that provides precise and responsive handling and performance. Knowing the tire is responding to your inputs will inspire your confidence.

W Performance Rated	200 UTQG Treadwear	AA Traction	A Temperature
------------------------	-----------------------	----------------	------------------

Professional driver on closed course

### Dry Performance

The continuous center rib combined with large outer shoulder tread blocks provide consistent contact with the road for a high level of dry performance.

### Predictable Cornering

The specifically formulated tread compound and reinforced internal construction were engineered to emphasize dry road response, traction, handling and high-speed capabilities.

### Handling Stability

The reinforced tread blocks and the large continuous center rib provide exceptional rigidity and stability.

**INVO®**

### LUXURY SPORT ULTRA HIGH PERFORMANCE RADIAL

The Invo® is an ultra high performance street tire that provides a blend of performance, ride comfort and quality. State-of-the-art computer aided engineering and specialized digital testing equipment were used to produce a tire that reduces perceived road noise, provides a comfortable ride and delivers increased traction in both dry and wet conditions.

WY	260	220	AA	A
Performance Rated	UTQG Treadwear for W	UTQG Treadwear for Y	Traction	Temperature

#### Dry Performance

The outer shoulder is made of large reinforced tread blocks, which increase the amount of surface area contacting the road. This feature assists with dry performance and cornering.

#### Handling Capability

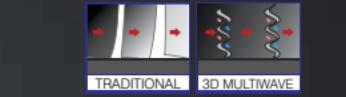

The continuous center rib provides continuous contact with the road. This structure increases the tire's rigidity and stability. This rigid design helps keep you connected to the road during hard braking and acceleration.

#### Reduced Pattern Noise

State-of-the-art computer aided engineering software and specialized digital testing equipment were used to produce an exceptionally quiet tire. The asymmetrical tread pattern allows you to cross-rotate with staggered front and rear fitments, which helps reduce irregular wear and noise.

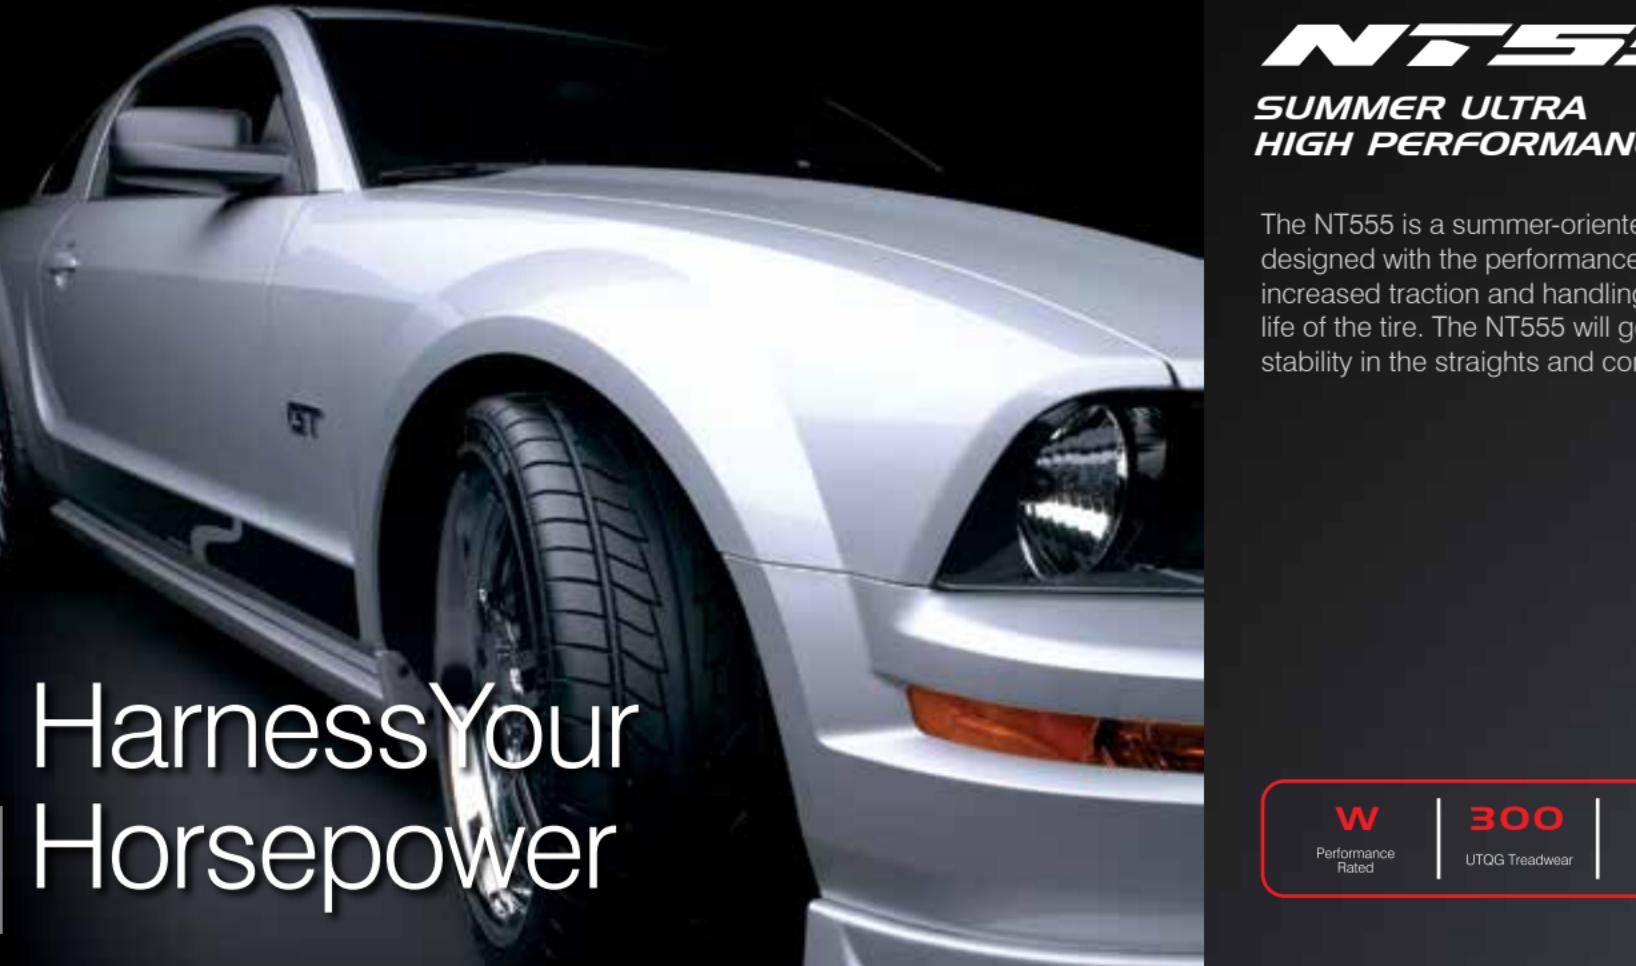

#### Wet Performance

The large twin circumferential grooves quickly channel water away from the tire so you maintain better road traction in wet weather. 3D Multiwave sipes were implemented to provide greater wet traction while solidifying the block to help reduce uneven wearing.

(See graphic for details.)

# Harness Your Horsepower

## NT555

### SUMMER ULTRA HIGH PERFORMANCE RADIAL

The NT555 is a summer-oriented ultra high performance street tire designed with the performance driver in mind. The NT555 provides increased traction and handling capabilities while prolonging the life of the tire. The NT555 will get you off the line quickly, provide stability in the straights and confidence in the corners.

W	300	A	A
Performance Rated	UTQG Treadwear	Traction	Temperature

#### Dry Performance

The large contact patch adds more rubber contacting the surface roads. This large contact patch provides improved dry performance while cornering, braking and accelerating.

#### Handling Stability

The tread blocks were reinforced to provide great rigidity and stability. This creates a consistent contact patch under various driving conditions.

#### Tread Compound

The advanced tread compound balances dry traction and treadlife.

# All-Season Performance

**NEO テク GEN®**

**ALL-SEASON ULTRA HIGH PERFORMANCE RADIAL**

The Neo Gen® is an all-season ultra high performance radial created to provide a comfortable ride in all weather conditions. Its silica-reinforced tread compound and asymmetrical non-directional design help provide comfort, performance and peace of mind all year round.

**VW** | **280** | **AA** | **A**

Performance Rated      UTQG Treadwear      Traction      Temperature

**RIDE COMFORT**      **QUIETNESS**      **WET PERFORMANCE**      **DRY PERFORMANCE**

**All-Season Performance**  
Deep circumferential grooves work in unison with the slanted three-dimensional tread blocks to evacuate water to help maintain contact with the road and provide increased wet traction.

**Reduced Wear**  
The inner shoulder is made from one continuous block, which adds stability and reduces tread flex. By reducing tread flex, the tire wears more evenly, even on vehicles with negative camber, resulting in longer tread life.\* 3D Multiwave sipes are cut into interlocking ripples instead of straight lines so they provide additional wet traction while keeping the block firm to help reduce wear.

(See graphic for details.)

**Enhanced Cornering**  
The large outer shoulder blocks are designed to increase surface contact and provide improved traction while cornering.

# Keep Your Horses On The Track

## **NT05R™**

### D.O.T.-COMPLIANT COMPETITION DRAG RADIAL

The NT05R™ is a D.O.T.-compliant competition drag radial designed for serious drag racing enthusiasts. The specialized race compound and large contact patch were engineered to provide maximum traction and promote even pressure distribution across the tread. The enhanced sidewall construction provides longitudinal launch traction while maintaining stability throughout the pass. You'll get off the line quickly and down the track with speed and consistency.

The NT05R™ is recommended for dry competition use.  
(See safety warnings on page 62 for more details.)

#### Competition Performance

The large solid center rib provides a continuous contact patch for dry traction.

#### High-Speed Stability

The enhanced sidewall construction combined with high-modulus bead filler and large shoulder blocks increase straight-line stability.

#### Specialized Race Compound

The new drag racing-specific compound was engineered for increased traction at the starting line.

# Street/Strip

## **NT555R**

**D.O.T.-COMPLIANT COMPETITION DRAG RADIAL**

The NT555R is a D.O.T.-compliant competition drag radial designed with additional flexibility for the weekend drag racer. The NT555R combines a high-grip compound and semi-racing construction to provide increased traction at the starting line. The tire comes molded at 6/32 of an inch and features a unique reinforced belt package to provide improved traction and high-speed stability. The NT555R is the performance radial for the street or strip.

<b>VWY</b> Performance Rated	<b>100</b> UTQG Treadwear	<b>A</b> Traction	<b>A</b> Temperature
---------------------------------	------------------------------	----------------------	-------------------------

The NT555R is recommended for dry competition use.  
(See safety warnings on page 62 for more details.)

### **Competition Performance**

The overall construction has been modified to improve launch performance. The NT555R was designed to achieve a balance between maximum dry performance and occasional street use.

### **High-Speed Stability**

Semi-radial construction combined with a unique reinforced package helps provide stability at high track speeds.

### **Consistency**

The tread compound is formulated to achieve a balance between treadwear and drag strip performance. The compound is formulated to be less sensitive to heat degradation and to retain its performance throughout the life of the tire. The compound working temperature was widened to work under a broader range of track temperatures.

(See safety warnings on page 62 for more details.)

## Safety Warnings

Caution! The Nitto® NT05R™, NT555R, NT555RII, and NT01 meet U.S. D.O.T. requirements, but they are not intended for highway use as the expected miles of wear from the racing compound is greatly reduced. These tires are not recommended for driving in wet weather conditions where there is risk of hydroplaning. Drivers should drive cautiously at reduced speeds in these conditions.

Warning! Use extreme care with any vehicle with large diameter tires and increased ground clearance due to the risk of rollover and possible injury or death. Use extreme caution and reduce speed during turns or abrupt maneuvers. Always wear seat belts, drive safely, and recognize that vehicle stability is reduced in off-road terrain. Do not drive a vehicle with an altered suspension unless you are familiar with its unique handling characteristics and are confident in your ability to maintain control under all driving conditions.

Warning! Serious injury may result from tire failure due to under-inflation and/or overloading. You must adjust your tires to the proper inflation pressure recommended by either the vehicle manufacturer's tire information placard, your authorized Nitto® Tire dealer, or contact Nitto® Tire at (888) 529-8200 for more information. Make sure to inspect your tires for any signs of damage before proceeding onto public roads.

Nitto® Tire does not endorse the operation of any vehicle in an unsafe or unlawful manner.
