

PRO COMP
off-road driver™

HISTORY

In 1985 Pro Comp began offering products for off-road enthusiasts. What started out with a small offering has grown to be the most complete range of off-road suspension systems, wheels, tires, lighting, shocks, leveling kits and accessories in the industry. Today our high-tech design and manufacturing facilities set the standard for quality, precision and performance. Pro Comp's commitment to excellence has advanced the level of refinement and technology needed to satisfy modern truck, Jeep and SUV drivers.

1985

Pro Comp begins manufacturing lighting in 1985 when the company was founded as 'Explorer Competition Products'

1992

Pro Comp begins manufacturing and selling high-quality, durable and high performance off-road suspensions

1998

Pro Comp takes on tires as they introduce a line of new radial light truck tires

2002

Pro Comp introduces MX6 adjustable monotube shocks and new alloy wheel

2008

Pro Comp is the first suspension manufacturer to pass the NHTSA Electronic Stability Control System Test

2011

Pro Comp introduces Pro Runner Monotube shocks

2012

Pro Comp introduces an industry first on its most popular suspension systems: the LIFT Shield 5 year/60,000 mile powertrain warranty

2013

Pro Comp successfully passes the Federal Motor Vehicle Safety Standard (FMVSS 126) test with six vehicles in 12 months.

2014

Pro Comp introduces its newest line of high performance LED light bars and sport lights

MANUFACTURING

From the beginning, Pro Comp has maintained a commitment to manufacturing excellence. Today, our manufacturing and R&D facility in Southern California covers over 200,000 square feet and is outfitted with an arsenal of state-of-the-art equipment. Our 200-member team – comprised of some of the most talented engineers, fabricators and designers in the industry – is consistently developing new products and technology to stay ahead of the competition and exceed customer expectations. Products go from concept-to-reality under one roof and then undergo rigorous testing and refinement until they are proven for production. This impressive operation monitors the evolution of each product and makes sure it will provide the best performance and durability possible.

MOTORSPORTS

Competition breeds innovation. Off-road racing has always played a critical role in Pro Comp's development of new products. Today, we work with race teams in short course racing, desert racing, rock crawling, and speed/endurance off-road racing. Our sponsored racers cover every sort of terrain so our products see action and get abused in the harshest conditions. Whether it's an 800hp tube chassis Pro 4 Unlimited racing in the Lucas Oil Off Road Series or a production-based JK competing in the King of the Hammers Everyman Challenge, the race for the podium is what drives us to make our products the very best.

PRO COMP GIRLS

We can't forget the beautiful ladies who help us showcase our awesome products and vehicles. Then again, maybe we are just looking for an excuse to invite models out on photo shoots with us? We hope you enjoy the view.

► SERIES 39: INERTIA

The new Inertia is focused on both form and function. With its reinforced bead lip, precision milled windows and massive load capacity, this wheel is perfect for everything from trails to towing.

FEATURES AND SPECS

- ✓ Hefty 7-spoke design
- ✓ Reinforced performance bead lip
- ✓ Real stainless steel bolts in lip
- ✓ Satin black with precision milled windows
- ✓ Available for most popular Jeeps along with 1/2 ton, 3/4 ton and 1 ton trucks

FINISHES

Black Satin Milled (5139)

BOLT PATTERNS

5-, 6- and 8-Lug

SIZES

17", 20" diameters

BOLT PATTERNS	SIZES RANGE	STRUCTURAL WARRANTY	FINISH WARRANTY	EXTREME LOAD	TPMS OK
5, 6, 8 LUG	17", 20"	LIFETIME	2 YEARS	RATED UP TO 3500 LBS	YES

► SERIES 40: VERTIGO

The new Vertigo screams performance and design. This race-inspired mesh wheel features a strong beadlock design with a reinforced bead lip for added strength under the most extreme conditions.

FEATURES AND SPECS

- ✓ High performance mesh design displays racing heritage and a backbone for off-road racing.
- ✓ Aggressive simulated beadlock styling with reinforced performance bead lip
- ✓ Available in satin black with precision-milled windows or matte graphite with black lip
- ✓ Available for most popular Jeeps along with 1/2 ton, 3/4 ton and 1 ton trucks

STEEL WHEELS

Pro Comp has the right steel wheels for your off-roading adventures. Made with the best available materials, thicker welds and extremely tight tolerances, our steel wheels are perfect for those who want a set of rims without the additional expense of alloys. Their price and tough build make them ideal for the harshest terrain.

- Available in flat or gloss black
- Eight welds for added durability and strength
- Optional center cap
- Lifetime Structural Warranty

			
STRUCTURAL WARRANTY	15" LOAD CAPACITY	16-17" LOAD CAPACITY	TPMS OK
